**AN ACT**  
**ESTABLISHING THE PHILIPPINE GERIATRIC MEDICAL CENTER,**  
**OTHERWISE KNOWN AS THE "SENIOR CITIZENS' HOSPITAL", AND**  
**APPROPRIATING FUNDS THEREFOR**

**EXPLANATORY NOTE**

Section 11, Article XIII of the 1987 Constitution declares that, "the State shall adopt an integrated and comprehensive approach to health development which shall endeavor to make essential goods, health and other social services available to all the people at affordable cost. There shall be priority for the needs of the underprivileged, sick, elderly, disabled, women, and children. The State shall endeavor to provide free medical care to paupers".

The Philippine Constitution clearly articulates the broad policy framework relative to older persons. Article XV, Section 4 provides that "the family has the duty to care for its elderly members but the state may also do so through just programs of social security".

Based on the second report of the Longitudinal Study of Aging and Health in the Philippines (LSAHP) project, *Aging and Health in the Philippines, Wave 2* (LSAHP Wave 2), states that based on worldwide demographic trends, the Philippines is projected to shift to an aging society by 2030, spurred by a recent sharp decline in fertility rates and increased life expectancy.

Given the increasing elderly population in the country and the escalating cost of healthcare, there is a need to strengthen the support system for senior citizens as the Philippines transitions to an aging society by 2030.

By affirming the significant contribution of the older persons, the proposed measure recognizes the need to put in place policies and programs that will entitle the elderly to adequate social services.

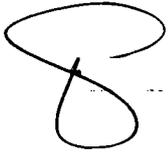

In view of the foregoing, this bill seeks for the establishment of the Philippine Geriatric Medical Center, an envisioned world-class tertiary hospital specializing on the medical needs of senior citizens.

In this light, the immediate passage of this bill is recommended.
